SIGMA PROFILE

SIGMA Profile One of the products widely used in the construction and production materials sector is sigma profiles.

In order for the material to reach the desired strength, the products in question are mass produced.

The products in question are prepared at extremely high strength rates and prepared with sheet metal profile designs.

In addition, the products that are produced in various sizes ensure a safe use.

Section Names		Production Range
H	Height	*
A	Top Edge Width	*
B	Bottom Edge Width	*
C	Thickness	*
F	Upper Nail Height	*
G	Lower Nail Height	*
E	Connection Level	*
F	Projection	*
K	Depth	*
